Rajiv Gandhi University of Knowledge Technologies, Nuzvid

Objective

I am currently pursuing a third-year Bachelor of Technology in Computer Science. Actively learning all the core subjects and the new technologies in the current tech world. Actively looking for an internship to expand my knowledge of the IT world and to use the theoretical knowledge I've gained so far to solve real-world scenarios and problems.

Projects

1 - To_The_Future

Duration: Currently working on it.

Team Size: 1

Role Played: Main role Skills Used: Android Studio

"Future me" is an android mobile application is built in Android studio. This apprecords the memories of the present and sends them to the future (desired date).

- -Human life has certain milestones that should be reminisced all throughout the life, but human memory can't hold every detail of life.
- -Sometimes we should be the one to motivate ourselves in the journey of life, but we forget to do that and remain unmotivated.

-Cheering someone who is beloved to you brings you joy, but by indulging in one's own life you forget to do that.

Here come this app doing all these things at a time leaving you satisfied.

2 - Portfolio

Duration: Currently working on it.

Team Size: 1

Role Played: Main role Skills Used: HTML,CSS,JS

Creating my own portfolio to showcase all my projects and representing my designing skills in each and every corner. I am assuming it to be a landing page for my own work.
