2 - To_The_Future(Web App)

Duration: 10 days **Team Size:** 1

Role Played: Front End Developer

Skills Used: HTML,CSS,JS

"Future me" is a *desktop web application* is built with HTML,CSS,JS.This app records the memories of the present and sends them to the future(desired date).

- -Human life has certain milestones that should be reminisced all throughout life, but human memory can't hold every detail of life.
- -Sometimes we should be the ones to motivate ourselves in the journey of life, but we forget to do that and remain unmotivated.
- -Cheering someone who is beloved to you brings you joy, but by indulging in one's own life you forget to do that.

Here comes this app doing all these things at a time leaving you satisfied.
